Dear Sir

Implementation of GLW Oil Purifier System onboard M/T Tristen

Thank you for recommending the GLW's Oil Purifier System to us and for installing the System onboard M/T Tristen for its Main Engine in May 2009

Prior to installation of this GLW Oil Purifier System, we were always having problems with the turbocharger shaft, which often required unscheduled maintenance. The problems were caused by high level of insolubles in the engine lubricating oil.

The unscheduled maintenances resulted in additional maintenance costs and increased downtime.

Since the installation of the Oil Purifier System, the vessel is able to run more smoothly with lesser downtime. At the same time, we are able to prolong the oil change interval which in turn reduces oil disposal and the needs to purchase new oil, thereby increasing cost savings.

We will not hesitate to recommend your Oil Purifier System to our friends and business associates.

Thank you once again.

Yours faithfully
Superin Chemical (S) Pte Ltd
