

I used your automotive product on two of my military vehicles in my private collection and in both cases the Rust Bullet stopped the rust dead. One of these was a 1957 M 52 five ton tractor that had been painted many times without proper preparation and the rust was rampant in places. All I did was wire brush off the loose rust and paint and it looks very good now. Sorry no pictures of this but I am going to order another can or two as soon as I redeploy.

Very Respectfully,
